

The buyer's guide to  
continuous improvement

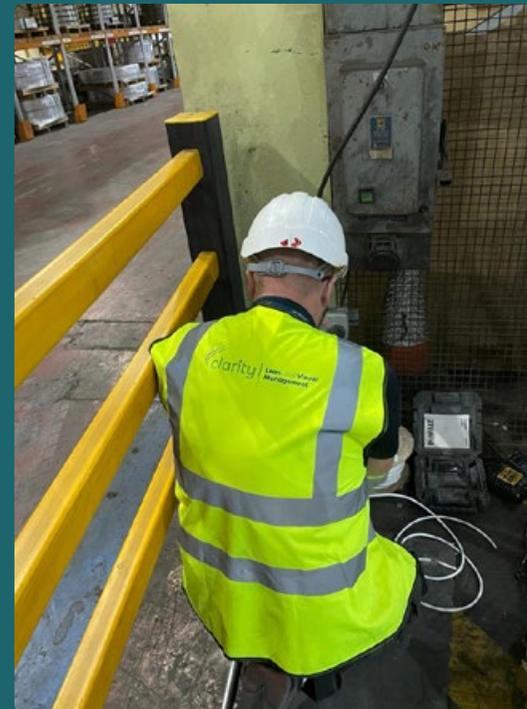

## Project Management

- > We understand that a successful project goes beyond just the physical transformation of your space – it requires meticulous planning, seamless coordination, and expert project management. That's why, with Clarity we take pride in offering our comprehensive methodology, to ensure that every turnkey project has a smooth and efficient journey.

Clarity Project Management delivers your safe visual site without the stress!

## 3D Approach

- > Our unique 3D approach supports a proven process incorporating the lean, visual and safe benefits of Operational Excellence.  
A guaranteed methodology for your project's success.

### Discover

All projects are only as good as a thorough understanding of the desired outcome. That's why all our projects start with an onsite assessment to understand your vision. We then align this with Operational Best Practice to produce a clear project scope.

### Design

Closely collaborating between you, our Lean experts and our team of designers, we will produce a carefully crafted project scope. Whether this is a 3D Visual Factory design, or a carefully crafted OpEx coaching program, our experience in Operational Excellence optimises the success of your project.

### Deliver

Working with our carefully selected consultants and supply chain partners, we will transform your vision from design to reality.

## Visual Safety Protection Barriers

Clarity Visual Safety Barriers provide protection for people, assets and equipment to create safe and visual conditions in the workplace.

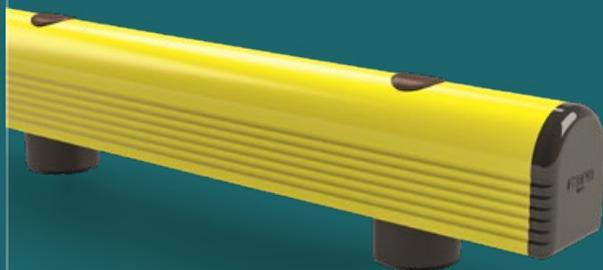

- ✓ V0 FIRE RATING
- ✓ MODULAR CONSTRUCTION
- ✓ SLIM PROFILES
- ✓ SCRATCH RESISTANT

## Visual Safety Protection Barriers

People, machinery, and assets are the main areas that suffer damage from moving vehicle impacts. Our walkway and pedestrian barriers offer a comprehensive solution to safeguard your workspace and personnel from potential hazards.

- ✓ SCRATCH-RESISTANT

## Cold Range Barrier Products

In environments with negative temperatures, such as food preservation warehouses, our cold line barrier range offer protection, where other barriers may not.

# Pull Out / Tensa Barriers

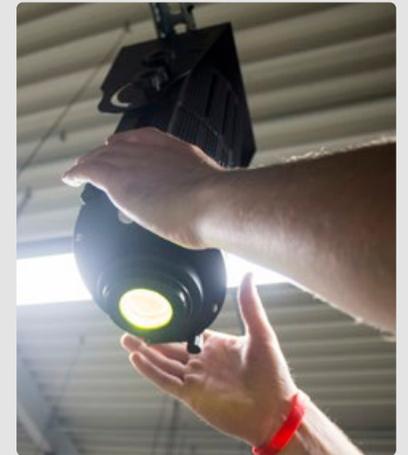

Some areas in the factory need to be cordoned off, but a permanent barrier cannot be installed due to frequent use of that area. Tensa or Tensile barriers offer a semi-permanent solution for pedestrian segregation and are very versatile.

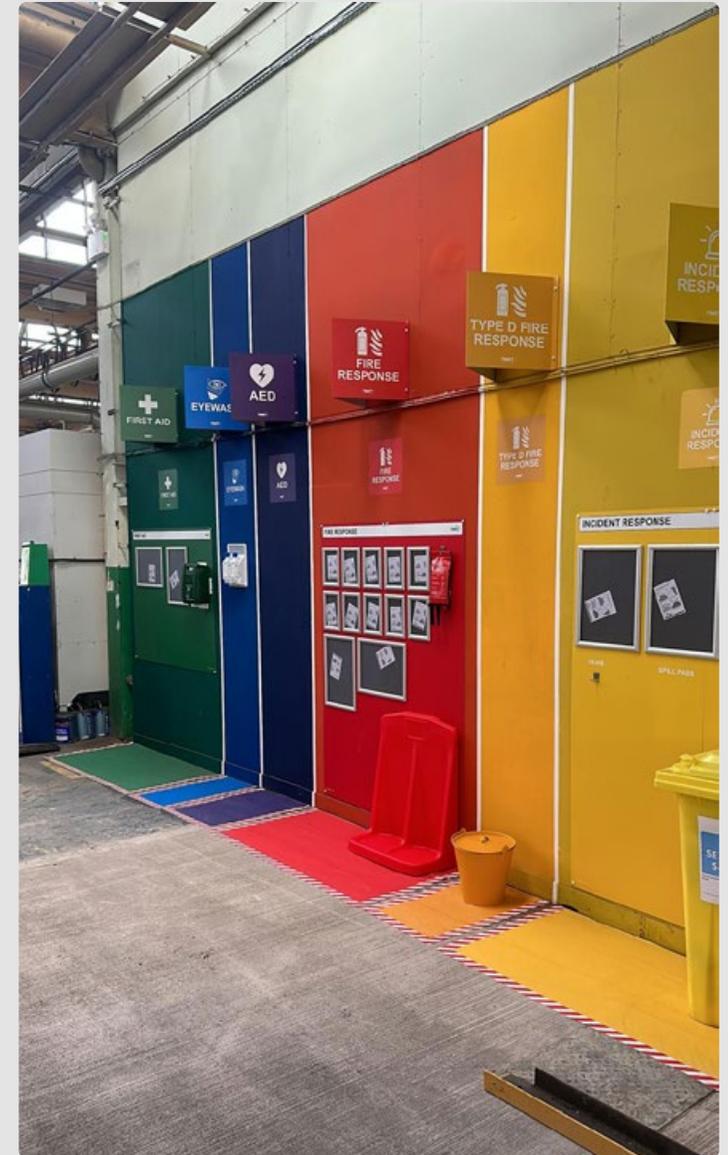

## Projected Floor Markings

Clarity Projected Floor Markings use the latest technology to provide highly visual and safe working environments.

## Health & Safety Walls

Clarity's Health & Safety walls serve their purpose as a beacon within your factory. The vibrant colours are designed so employees are able to quickly locate the correct items in an emergency response. These walls also act as a constant reminder to employees of the importance of their well-being and encourages employees to adhere to safety measures.

## Control Rooms

With streamlined layouts and integrated technology, our Control Room solutions foster efficient collaboration, enabling swift decisions and proactive problem-solving. Say goodbye to firefighting and hello to strategic control, keeping your business ahead of the curve.

## Custom Workbenches

Our custom workbenches and workstations are also designed to meet your unique needs and preferences. Whether you require specialised tool-holding benches, work benches with storage, or ergonomic benches, we can manage it.

Compatible with foam cutouts - See page 25

We can provide a variety of different workbench materials and RAL colours ensuring brand consistency, and can tailor each workbench to your specific requirements for working.

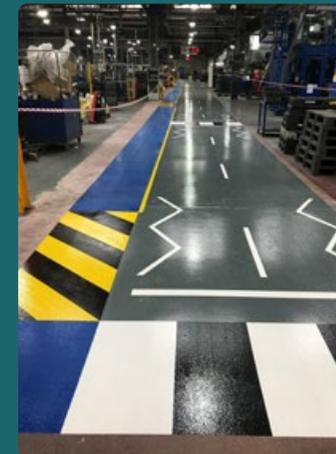

## Custom Workshop Furniture

Custom Workshop furniture creates a clean working environment, fully adapted to your needs. This helps to increase worker satisfaction.

## Floor Matting

- > Interlocking tiles to form any length or width area
- > Extremely hardwearing
- > Anti-fatigue properties for workers that stand for long periods of time
- > Made from fully recyclable material
- > Can be cleaned with a pressure washer
- > Helps to improve worker comfort, safety and satisfaction

## Floor Markings and Coatings

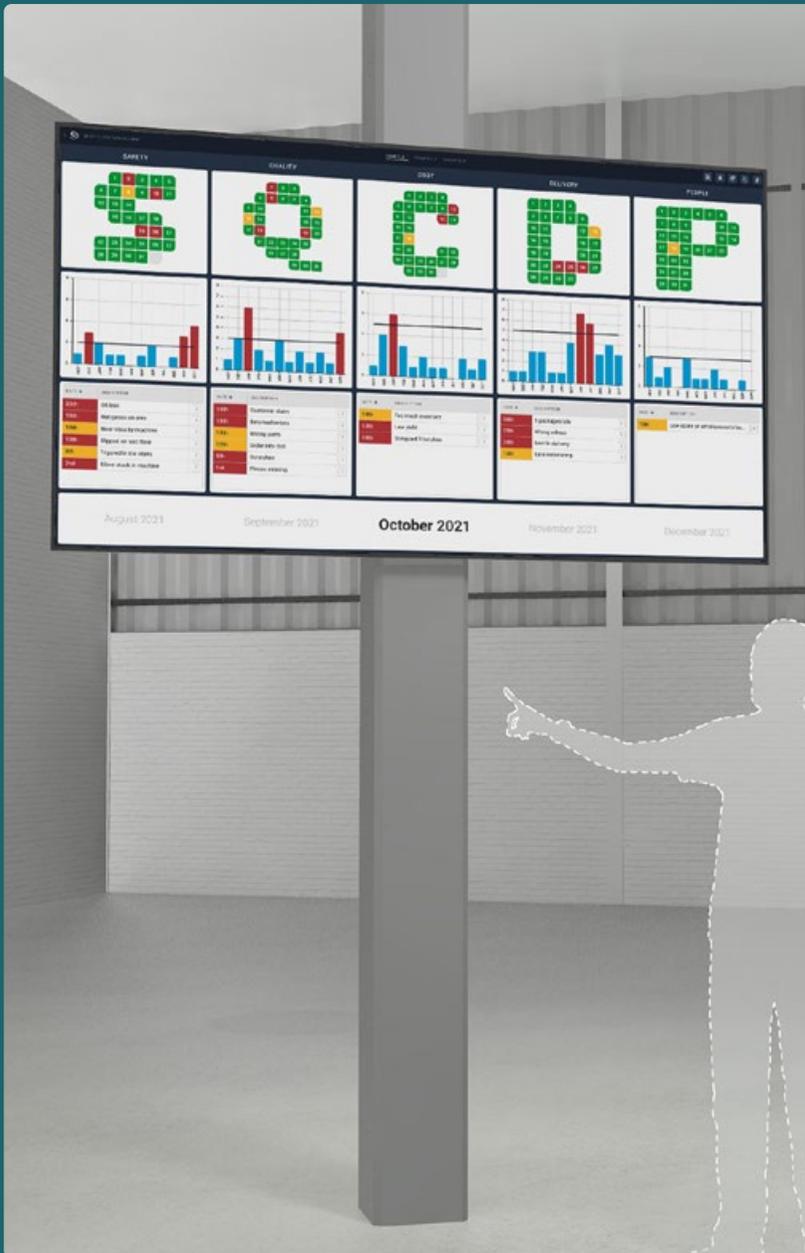

Strategic Floor Marking creates order and patterns of work in your facility, which eliminates time wasted in searching within a work area.

## Mightyline Floor Tapes

The mightyline floor tapes, floor signs, and floor markings are made to hold up to the rigors of warehouse activity, and also have a patented design. In addition to the high durability of these products, they are easy to install and have minimal residue on removal. Mightyline tapes are also 7 times thicker than the average floor tape and have beveled edges to ensure MHE traffic does not rip up the tape.

Freezer range of tapes also available for use down to -25 degrees C.

## Electronic Visual Management

Bespoke electronic signage created to your requirements

- > Remote reset function
- > Customisable LED message

## Visual Management Boards

At Clarity we offer a range of visual management boards to monitor and track the success of your daily operations, and to help implement Lean operating procedures:

- > SQDIP Boards
- > 5S Boards
- > PTW Boards
- > LOTO Boards

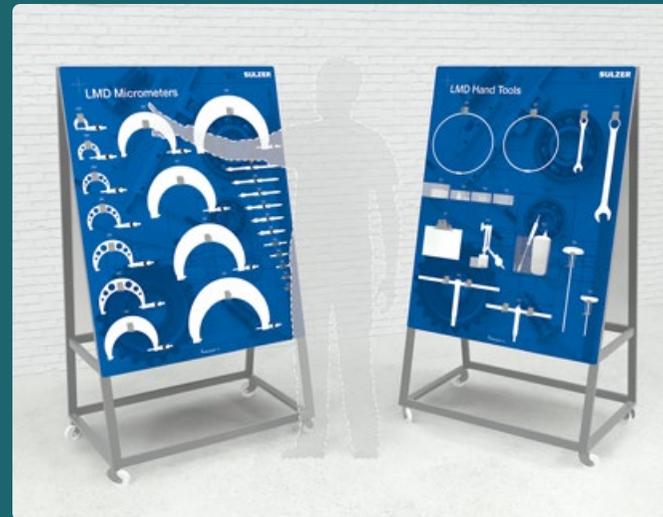

## Cleaning Stations

All of our cleaning stations start as concepts based on the individual needs of you and your business.

## Tool Shadow Boards

Our shadow boards are a simple solution with enormous potential to save time and promote tidiness, and therefore lean practices within the workplace.

## Operational Excellence Academy

Clarity's Operational Excellence Academy brings together your team, our experience, and the collaborative power of visual communication to ensure a culture of Continuous Improvement is cultivated throughout your organisation.

## Coaching and Training

### Coaching

Providing mentorship to enable lasting culture change.

### Training

Empowering your workforce with the right knowledge to ensure efficient operations and continuous improvement.

## What our clients say

“

The quality of the work they send... and the passion that they all share is second to none.

*Mark Rosser  
Production Manager at E&R Group*

We get a first class product and a first class service.

*Steve Underhill  
Operations Manager at Jotun Paints*

We've tried 6S and continuous improvement on and off at this site with various different budgets and I would say that with Clarity, this is the first time that we have had buy-in from the top and throughout the business and it's working better than we ever could have hoped for!

*Steve Lomax  
Site Operations Manager, Crown Paints*

”
